SIGCOREUC
ENGINEER. CONTROL. INNOVATE.

MAY 2025 | CAMPAIGN LAUNCH
Your next-gen test controller is **now live.**

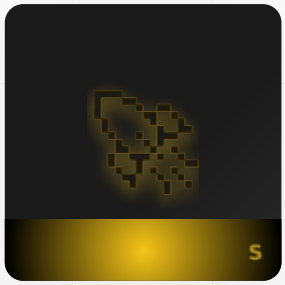

PRECISION CONTROL. REAL POWER.

We're featuring the most capable compact engineering controller built for developers, engineers, and automation professionals who demand reliable, high-performance systems.

SIGCORE UC

ADVANCED COMPACT GENERAL-PURPOSE TEST CONTROLLER

SigCore UC is built for developers and engineers who need stable, high-performance control in compact environments. Replace PLCs, DAQs, and custom wiring with a single integrated system.

Designed for lab testing, validation, and real-world integration — featuring industrial-grade PID loops, signal conditioning, relay outputs, and full Python/.NET programmability.

KEY SPECIFICATIONS

RELAY OUTPUTS

8 isolated relay channels — 120VAC / 10A or 30VDC / 2A. SPDT with NO & NC contacts. ~10ms switching time.

DIGITAL INPUTS

8 channels (DI1–DI8). ON: 2–24VDC. OFF: 0–0.5VDC. Ideal for sensors, switches, and logic signals.

ANALOG INPUTS

4 channels (AI1–AI4). Supports 0–5VDC, 0–10VDC, 0–500mV, or 4–20mA. Software-configurable calibration.

ANALOG OUTPUTS

4 channels (AO1–AO4). Selectable 0–5VDC or PWM mode. Ethernet or USB connected via Modbus control panel.

WHY ENGINEERS CHOOSE SIGCORE UC

FAST SETUP

Run tests quickly without complex setup or multiple tools.

NO CODE REQUIRED

Basic use with no programming. Advanced with Python or .NET.

INTEGRATED DATA

Capture and log test data automatically as tests run.

SIMPLIFIED DESIGN

Replaces PLCs, DAQs, and custom wiring in one device.

SHARE THIS

Forward to a colleague or engineer who would love this project.
