SIGCOREUC
ENGINEER. CONTROL. INNOVATE.

MAY 2025 | CAMPAIGN LAUNCH
Your next-gen test controller is **now live.**

PRECISION CONTROL. REAL POWER.

SigCore UC is a compact automation and instrumentation platform designed to replace PLCs, DAQs, signal conditioners, and custom software with a single integrated control system.

8 Relay OUTPUTS
8 Digital INPUTS
4 Analog IN & OUT

FEATURED CAMPAIGN

NOW LIVE ON CROWD SUPPLY

SIGCORE UC

WHY THIS IS DIFFERENT

SigCore UC is designed for engineers who need to build real automation systems quickly, without stitching together separate PLCs, protocol gateways, scripting environments, and custom software from scratch.

Unlike traditional PLC or DAQ setups, SigCore UC combines industrial I/O, scripting, monitoring, calibration tools, and protocol integration into a single compact platform that is easy to deploy, maintain, and expand.

KEY SPECIFICATIONS

8 RELAY OUTPUTS

Isolated relay outputs rated for 120VAC / 10A with NO/NC terminals. SPDT contacts with full signal conditioning built in.

8 DIGITAL INPUTS

- VIN > 2VDC = ON
- VIN < 1VDC = OFF

Fully conditioned and ready for direct sensor and switch connections.

4 ANALOG INPUTS

- 0–5VDC
- 0–10VDC
- 0–500mV
- 4–20mA

4 ANALOG OUTPUTS

0–5VDC output or PWM output support. Ethernet and USB connected monitoring, calibration, and configuration software included.

PID CONTROL

Built-in industrial-grade PID loops for closed-loop process control. All I/O fully conditioned and ready for direct use.

PROGRAMMING

Python, .NET, and LabVIEW APIs with example code and documentation included. Faster setup for test systems and industrial automation.

WHY ENGINEERS CHOOSE SIGCORE UC

FASTER SETUP

Reduced setup time for test systems and industrial automation workflows.

LESS COMPLEXITY

Reduced integration complexity — no more stitching separate tools together.

FLEXIBLE CONTROL

Flexible control logic for custom workflows, instrumentation, and monitoring.

ALL-IN-ONE

Industrial I/O, scripting, protocols, and calibration tools in one compact platform.
